5 Time-Saving Techie Tips
That Will Add An Hour Or MORE To
Your Day.....Page 1

Business Owners Beware: Find Out Why
You Can Be Held Liable For Accidents
Caused By Employees Using Their Cell
Phones While Driving.....Page 3

Bottom line: Properly monitored and maintained networks run faster, have fewer problems and cost less to maintain. Yet some of our clients are hanging tight to our old “we’ll call you when we need you” model of service, which does NOT allow us to PROACTIVELY watch over your network to prevent disasters, downtime, viruses and other expensive data-erasing disasters.

So, to make it a “no-brainer,” we’re going to give all non-XperCARE managed service clients a free 90 day monitoring service to demonstrate how many problems we can catch. There’s no cost or obligation to stay on this service – but we’re betting you’ll “see the light” and sign up at then end of the free trial. **Call us at 410-884-0225 or sign up today at www.xpertechs.com/xpercure**

“Insider Tips To Make Your Business Run Faster, Easier, And More Profitably”

How To Think Like A Geek (And Add An Extra Hour Of Free Time To Your Day)

Who wants to find an extra hour of free time in their day, every day? Considering we’re all stressed out because there’s never enough time to get everything done, this is what I would call a “leading” question.

So how can you do it? By looking at the seemingly innocent, time-sucking activities you are spending time on ever day and either automating them or speeding them to completion using technology. Can it really be that simple? It can, but you need to understand one critical factor first...

The “Latte” Factor

Best-selling author David Bach coined this phrase in his book “The Automatic Millionaire.” The latte factor is based on the simple idea that all you need to do to become wealthy is take a hard look at the small things you spend your money on every day and see whether you could redirect that spending into savings.

For example, a little \$2 purchase made every day on common things like Starbucks (a latte), bottled water, fast food snacks, cigarettes, etc. REDIRECTED into an investment account earning 6% will become \$10,199.30 in 10 years. If that’s true, why don’t MORE people do it? Because saving \$2 a day seems so insignificant that people spend ALL their money on these things and then have nothing left over to invest.

5 Time-Saving Techie Tips That Will Add An Hour Or MORE To Your Day

So the question is, what are some small, time-saving technologies we can use to automate or speed up what we get done to save us that precious hour? Here are our 6 favorites:

1. **Use an aggressive spam & spyware filter.** Over 80% of the e-mails being sent daily are not-so-delicious spam. And if you’re like me, you’re getting dozens of these every day, which can easily add up to 5-10 minutes per day sifting, sorting through and deleting the spam from the e-mails you want. Our **XperCARE Spam Filtering Solution** will take care of this for you for as low as **\$1.99/month** per user! We also recommend our **XperCARE Anti-Malware Protection Solution** because for only **\$1.79/month** per user you can have the best protection available from Viruses, Spyware, Malicious Software, etc. with NO Long-Term Contract!!! Plus, eliminating spam temptations from your STAFF will not only cut down on the time they waste on it, but will also drastically reduce your chances of getting viruses and spyware on your network.

Shiny New Gadget of the Month

Livescribe Pulse Smartpen

This month's gadget is PERFECT for not only students but also busy CEOs who love going to educational conferences and taking lots of notes. Here's why...

Taking good notes during class - even with the most rapid-fire professor - just got a whole lot easier. The Livescribe Pulse Smartpen may look like your average pen (it's about the size of a Sharpie), but it also packs in a voice recorder and up to 2 GB of storage. So far so good, but here's the really cool part: Not only does the Pulse remember everything you've written in digital form (you can sync your handwritten notes onto your PC or Mac and even share them online), it also keeps track of whatever was being said while you were scribbling a detail — just tap a word to hear all of what Professor Motormouth was saying at that particular moment.

What's the trick? The Pulse Smartpen's infrared sensor uses the tiny dots on the custom (and required) Livescribe notebook paper as reference points.

Price: \$199, plus \$13 to \$25 each for the "dot" notebooks.

2. **Replace Old PCs.** While it's hard to truly estimate how much total time is wasted waiting on an old, slow computer to process tasks, start up, etc., I can tell you, it adds up. Let's say your old PC takes 10 seconds longer to process a task than a fresh, new one. Might not seem like a lot, but with users averaging 100-150 tasks a day conservatively are wasting 16-25 minutes a day. Add in the crashes and other problems old PCs cause and you're probably closer to 30-35 minutes a day.

3. **Maintain Your Network.** Another tip that will save you a lot of time is patching, updating and optimizing your server and workstations. You'd be surprised how much slower even a new machine will start to run if not maintained properly.

4. **Document management.** This is a HUGE time-saver if you are a paper-heavy office (like attorneys, doctors, contractors, etc.). But even if you aren't, scanning and storing paper documents so they can be searched on and located in seconds rather than minutes or hours is a HUGE time saver. Plus, it's a greener solution, improves document security, enables users to access critical documents remotely AND (if that's not enough) prevents important paper from loss or damage.

5. **Implement SharePoint or Other Business Collaboration Software.** Be honest: how much time is wasted in your office because people are duplicating efforts, can't find information and documents they need or backtracking to FIX mistakes made? This, like time wasted on old PCs and downtime, may be hard to calculate, but I would conservatively guess that folks are wasting at least 30 minutes a day or MORE because of disorganization. That's why we recommend growing companies implement some type of collaboration software that will help organize projects and information, making it easier for everyone to get on the same page.

Want To Implement Any Of These In Your Office?

Give us a call and we can show you how these technologies (and dozens of others we offer) can streamline your operations, saving you a LOT of time!

Backup & Disaster Recovery – Secure Club!

On July 28th, the XPERTECHS BDR Team hosted a webinar on Backup and Disaster Recovery: *What Every Business Owner Must Have in Place*. XPERTECHS President, Michael Mellott, shared details and expertise on how business owners can prevent significant business interruptions due to failed backups.

Since then, our BDR Team has been busy implementing BDR solutions for three of our clients in the Educational and Legal fields. Each of these clients is now protected against significant business downtime due to hardware failure or worse! **Could your business be up and running in a little as 24hrs?** Do you only have a local backup of your critical data?

Protect your business, customers, and profits with our BDR solution!

Call before Sept 30th to take advantage of our promotional discount!

The Lighter Side...

Funny (And True!) Back To School Jokes

A teacher was explaining compound nouns to her class. "They are made up of two or more words, such as boxcar or townhouse," she explained, "Can anyone think of another?" To which one little boy eagerly raised his hand and said, "Asphalt!"

Teacher to student: "Give me a sentence that starts with the letter I"

Student: "I is..."

Teacher: "No, say, I am."

Student: "Okay...I am the 9th letter of the alphabet."

A teacher was assigned a new post of teaching English to prison inmates. Feeling a little nervous on his first day he started out by asking the class a basic question, "Okay, who can tell me what a sentence is?"

Driving through a neighborhood one afternoon, a teacher rolled through a stop sign. When she was pulled over, the cop realized he had just pulled over his 4th grade English teacher. "Mrs. Brown," he quipped, "those stops signs are a period, not a comma."

An elementary school had two second grade teachers; Mrs. Payne and Mrs. Hacking. One day a parent called into the main office to let them know her daughter would not be in class that day. The administrator asked, "Is she in Payne or Hacking?" Confused, the parent replied, "Neither...we have company today and I'm keeping her home."

A Smartphone And His Not So Smart Brother

Business Owner Beware: You Can Now Be Held Liable For Accidents Caused By Employees Who Are Talking On Their Cell Phones Or Texting While Driving

Over the past several years, states have been instituting laws to limit the use of cells phones while driving – so how does this affect companies who have employees using company vehicles? Quite a bit, actually.

Several lawsuits have cropped up in which a company was sued for an employee causing an accident while talking on a cell phone. In Virginia, an attorney driving home from work ran over a teenage girl, killing her. The family of the girl filed a \$30 million lawsuit against the employer because the attorney was talking to a client when the incident happened.

In the state of Arkansas, a jury found a lumber company liable after one of their employees struck another car, gravely injuring the passenger. At the time of the accident the employee driving the vehicle was using a cell phone for a sales call. That particular case ended up being settled for \$16 million.

Many states have defined hands-free laws and produced legislation that bans cell-phone use completely. Although employer responsibility isn't specifically defined in the cell phone legislation, there have been an increasing number of lawsuits relating to employer responsibility regarding mobile cell-phone use for employees. Hands-free laws have done little to protect employers from liability, and as the trend of cell-phone legislation increases, employers should be prepared to address their mobile workforce and advise them of the cellular phone laws that are in effect in your state or locality.

We recommend you talk to your attorney about implementing a mobile phone and vehicle use policy that all employees must sign. While this may not completely remove your risk of being held responsible for accidents or injuries caused by employees driving a company-owned vehicle, it does show some forethought and responsibility on your behalf.

XPERTECHS' BEST Offer Of The Year... And You Don't Have Much Time Left To Respond!

**"September Is the BEST Month to Upgrade Your
Computer Network or Start That New
Project You've Been Thinking About"**

**Call Us by September 30th To Get a No-Hassle Quote on
Any Upgrade or Project PLUS 2 FULL MONTHS of
XperCARE Support:**

- Network Planning, Installation, and Set Up
- Wireless Networking Solutions
- Backup & Disaster Recovery Solution
- Exchange 2010 Upgrades
- Windows Server 2008 Upgrades
- On-going Network Support and Monitoring

Warning: iPod Earbuds Are Known To Cause Permanent Hearing Loss

Listening to music on the radio is about as antiquated today as using a payphone. Modern music lovers now carry thousands of songs around with them in their iPod and listen while driving, working, exercising, completing chores, etc. Problem is, the earbuds that come with the iPods (and similar products) let in a lot of ambient noise. That means users crank up the volume to drown out whatever is going on in the background.

The volume on an iPod can be raised to 115 decibels (db) which is the equivalent of standing next to a moving subway train and only 5 db short of an ambulance siren. The average individual can tolerate up to eight hours of sound at 85 db before suffering hearing damage. For every 5 db over 85, the exposure time before irreversible damage gets cut in half, say audiologists.

Because so many earbud users have suffered hearing damage, Apple was taken to court; but a federal appeals court exonerated the company, noting that Apple puts warnings on its packaging and iTunes site and offers instructions on how to set volume limits on iPods.

To hear music at a reasonable volume, users can purchase headphones with in-ear monitors (IEM) that reduce noise. You can also have an audiologist make custom earbuds for you to ensure a perfect fit and reduce background noise. They cost about \$400 but will save your hearing.

How To Handle Cyber-bullying

When I went to school, the biggest threat on the playground was getting ruffed up by the class bully who was twice as big and twice as hairy as every other kid on the block. (What WERE his parents feeding him?) But Cyber-bullying is something very different.

Cyber-bullying is when a child, preteen or teen is tormented, threatened, harassed, humiliated, embarrassed or otherwise targeted by another child, preteen or teen using the Internet, interactive and digital technologies or mobile phones. It has to have a minor on both sides because once adults become involved, it is plain and simple cyber-harassment or cyber-stalking.

Turns out digital devices and the web make it much easier for a bully to harass someone; the anonymity and use of social media sites often make them bolder than they would be in a face to face confrontation, and give them more opportunities to badger their target. As a parent, this is just another good reason why you should be monitoring your child's PC and cell phone, as well as their Facebook, MySpace and other online social media site usage. Most social media sites have a way for you to report this type of abuse and get violators and hateful commentary taken down from their sites.

If your child becomes the target, you can try to get your school involved, but many schools have been shot down, even sued, for trying to interfere. If the abuse become physical, sexual or threatens physical or sexual harm, call the police. The schools aren't equipped to handle that level of abuse. The police do.
